

SEPA XML GENERATOR – INTERACTIVE DESIGN PROJECT – Diarmuid Haughian

Interactive Design Project Introduction

SEPA XML GENERATOR

SEPA XML GENERATOR is:

- B2B Financial Software
- The software only has one defined purpose
- It can generate an XML file used by customers to take direct debits payments from clients
- The XML File contains information on customers such as: Collection Date, Debit Amount, BIC, IBAN, etc.
- Once Generated the file is uploaded to a businesses Online Banking System, such as:

The screenshot displays the AIB - iBusiness Banking interface for Payment File Transfer. The user ID is QUALI984. The main menu on the left includes: FILE SUMMARY, FILE UPLOAD (selected), FILE MANAGEMENT, REJECTS / UNPAIDS, and AUDIT LOG. The File Upload form contains the following fields:

- OIN:** IE61SDD361908 - DIGITAL SALES (dropdown menu)
- Debit Date:** 01/05/2020 (calendar icon)
- File Name:** SEPA200418103738PAIN008.xml (Browse button)
- File Amount:** (empty text field)
- Customer Reference:** DIGITAL SALES

Buttons at the bottom: Reset, Upload File, Cancel.

A Successful
SEPA XML
FILE will look
like:

```
C:\Users\me\Downloads\SEPA200424082957PAIN008 (1).xml
C:\Users\me\Downloads\SE... x
<?xml version="1.0" encoding="UTF-8"?>
- <Document xmlns="urn:iso:std:iso:20022:tech:xsd:pain.008.001.02" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
  - <CstmrDrctDbtInitt>
    - <GrpHdr>
      <MsgId>DIG200424082957</MsgId>
      <CreDtTm>2020-04-24T08:29:57</CreDtTm>
      <NbOfTxs>1</NbOfTxs>
      <CtrlSum>50.00</CtrlSum>
    - <InitgPty>
      - <Id>
        - <OrgId>
          - <Othr>
            <Id>db</Id>
            </Othr>
          </OrgId>
        </Id>
      </InitgPty>
    </GrpHdr>
  - <PmtInf>
    <PmtInfId>DIGRCUR200424082957</PmtInfId>
    <PmtMtd>DD</PmtMtd>
    <BtchBookg>true</BtchBookg>
    <NbOfTxs>1</NbOfTxs>
    <CtrlSum>50</CtrlSum>
  - <PmtTpInf>
    - <SvcLvl>
      <Cd>SEPA</Cd>
    </SvcLvl>
    - <LclInstrm>
      <Cd>CORE</Cd>
    </LclInstrm>
    <SeqTp>RCUR</SeqTp>
    - <CtgyPurp>
      <Cd>CASH</Cd>
    </CtgyPurp>
  </PmtTpInf>
  <ReqdColltnDt>2020-04-27</ReqdColltnDt>
  - <Cdtr>
    <Nm>abc ltd</Nm>
    - <PstlAdr>
      <Ctry>IE</Ctry>
      <AdrLine>123 FAKE ST</AdrLine>
    </PstlAdr>
```

A Unsuccessful SEPA XML FILE will look like and will be rejected when submitted to the companies Bank:

```
<?xml version="1.0" encoding="UTF-8"?>  
<Document xmlns="urn:iso:std:iso:20022:tech:xsd:pain.008.001.02" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"/>
```

File Upload

File Upload Complete ✕

Your Payment File has been successfully uploaded to AIB. Please check File Management Screen for confirmation of file status.

Name	Reference	Size	
SEPA200418103738PAIN008.xml	0H1720EGGAAUS2T8	6.17KB	✓

This file has a SHA256 (Base 64) checksum value (**Gfq3oxtyFLdIFig4afRy5a34WsQOYoQVbRJ7c0L5Mxc=**) please refer to this when Authorising this file.

(3bf3ee847a1697cba1248cf1e517f2e0beac27d9) The display of this SHA1 checksum value will be retired to enhance security. It will be replaced by the SHA256 (Base 64) format displayed above.

THE PROBLEM:

Can Users Generate a Successful SEPA XML File without errors

Why:

SEPA XML GENERATOR believes users are having difficulty with the system

Goals & Objectives of Research:

Identify the Primary Pain Points – Formulate Solutions – Apply and Test

	<p>Two Types of Research:</p> <p>Questionnaire to understand concerns users of competitors solutions may have</p> <p>Define three system tasks and video record cursor actions and verbal thoughts of test users</p> <p>Collate data, document and identify issues</p>	<p>User Maps</p> <p>Empathy Map</p> <p>Story Boards</p> <p>Affinity Maps</p>	
<p>1 Day</p> <p>23.03.2020</p>	<p>Product Assessment</p> <p>Assessment of the software as is, define the most pressing issue and how can it be resolved?</p>	<p>As Is User Flow</p> <p>Heuristic Evaluation</p>	<p>Diarmuid</p>
<p>2 Days</p> <p>24.03.2020 and 25.03.2020</p>	<p>Strategy Workshop & Recommendations</p> <p>Address the most pressing concerns</p>	<p>To Be User Flow</p>	<p>Diarmuid</p>
<p>1 Day</p> <p>26.03.2020</p>	<p>Recommendations</p> <p>Sketch User Wireframe</p>	<p>Hand Sketched Wireframes</p> <p>Low Fidelity Wireframes</p>	<p>Diarmuid</p>
<p>3 Days</p> <p>27.03.2020 to 31.03.2020</p>	<p>Initial Concepts agreed and Designed</p>	<p>Design Concept</p>	<p>Diarmuid</p>
<p>14 Days</p> <p>01.04.2020 to 15.04.2020</p>	<p>Designs and UX Improvements Applied to Live System</p>	<p>Changes to Live System</p>	<p>Software Development Team</p>

Initial User Research:

The software target audience is typically:

- Small Business Owners with 1 to 10 staff members and in some cases up to 50 employees
 - Entrepreneurs and Start Up businesses with recurring revenue customers
 - Target Geographic: European States which are under the SEPA Umbrella
 - End Users: Business Owners, Administration or Finance Staff
 - User Environment: Office and Desk Based using Desktop type PC's
-
- The Quantitative and Qualitative research focused on the potential user group define above
 - Questionnaires targeted at user that use alternative solutions
 - Video Recorded 3 User Tasks with Accountants and Account Admin Staff

Questionnaire Findings

Key Findings:

System backups were considered important

Security was a priority and Deleting Old XML Files was considered a security improvement

User Experience:

System Aesthetics was of little importance

User Guides and Information Popups considered very helpful

Task Completion and Video Recording

3 User Flow Tasks and One Outcome

All 3 Steps completed but ZERO successful XML Files Produced

User Tasks Detailed

Task 1:

Add and save your company details to the system

Definition: the bank account details for your company, which will allow your company to receive payments.

Task 2:

Add one pretend Direct Debit Customer to your account who pays 50.00 euro

Definition: A person who has signed a direct debit mandate for 50.00 euro

Task 3:

Generate an SEPA xml file for the one customer just added to the system

Definition: Selecting a date in the future for the debit to be taken from the customer account

SEPA XML GENERATOR

PROJECT: SEPA XML GENERATOR

Date: April 2020

	Name: Eileen Whelan	
	Job / Role / Student of : Accounts Employee (Potentially Part Time)	
	Quote (likely to say): Easy to use and error proofed outcomes (files)	
	Background	Values (their priorities)
	Age: 55 Status : Married Education : Post Primary Location : Dublin Income : 32K	Family: Very Important Time: Important Money: Not as Important Success: Not Important Other: Life Balance Important
Tech Skills	Likes / Dislikes	Motivations & Influences
Usage Infrequent-----50%-----frequent	Things that work, improves my life, work efficiency and helps deliver on job requirements.	How my job performance can be improved? And I can justify my importance and value added to the team.
Skill Level novice-----35%-----expert		
Professional un-experienced-----45%-----experienced		

Goals

What is their goal? What job(s) do they want or need to get done?

Generate payments and invoice clients with the accounts package. No mistakes on the xml, over or under charges, essentially, NO mistakes. Mistakes equates to unhappy customers and extract accountancy work.

Pains (problem)

What current pain (problem) do they experience?

I'm not sure where to start. Am I sure this xml has the right users and amounts on it?

What do they need to be differently?

Educate themselves on the software. Take more time processing the files and double check the files.

Gains (benefit)

What would be a great outcome/success for them?

Easier to use

Easier to track and verify payments/customers and amount

What consequences are caused by this?

Frustration

Buy an Alternative Solution

Mistakes and Loss of time

Unhappy Customers

How might they measure success?

Reviews

Surveys

Referrals

Change!

What do they need to do differently?

If it was easier to verify that the amounts and totals of the direct debits are correct, that would be great!

SEPA XML GENERATOR

PROJECT: SEPA XML GENERATOR

Date: April 2020

	Name: Edward Collins	
	Job / Role / Student of : Company Founder	
	Quote (likely to say): Secure, Easy to use and Accessible (always available)	
	Background	Values (their priorities)
Age: 35 Status : Married Education : Third Level Location : Dublin Income : 85K	Family: Important Time: Very Important Money: Important Success: Extremely Important Other: Business Growth	
Tech Skills	Likes / Dislikes	Motivations & Influences
Usage Infrequent — 30% — frequent	Efficiency, Getting Things Done, Getting Payments and Sales.	How can I get paid regularly, on time and get more customers on direct debit payments? So, I can manage cash flow better and meet outgoings.
Skill Level novice — 60% — expert	Dislikes: Problems, overpromises and costs.	
Professional un-experienced — 50% — experienced		

Goals

What is their goal? What job(s) do they want or need to get done?

Add new customers quickly, confirm the debit amounts and generate the sepa xml file. Push these transactions into the company accounts software. No mistakes.

Pains (problem)

What current pain (problem) do they experience?

How secure is this? Is this a reputable company?
Are my customers banking details secure? And mine?
I can't remember how to use this again, how do I add a customer again?

Gains (benefit)

What would be a great outcome / success for them?

Increased Security Settings
More Instructional User Flow – Steps to Add a user
Quick User Video Links

What consequences are caused by this ?

Fear regarding sensitive data
Lack of Trust
Frustration
Buy an Alternative Solution

How might they measure success?

Better User Experience
Time it takes to Add a New Customer
Extra Security Features

Change!

What do they need to do differently?

A bit of double entry with the Customers which is a little annoying could be removed, but a quick refresher video would be also be handy, as I only use the system once a month.

HEURISTIC EVALUATION OF CURRENT SYSTEM AND AS IS USER FLOW

Heuristic Evaluation – SEPA XML GENERATOR

Visibility

The are no visible breadcrumbs or process steps for the user to follow in order to generate a file, the user must make assumptions.

Mapping

Links should be more description, such as: Home/Dashboard, My Customers, Archived XML Files. Regularly used Links should appear at the top of the sequence

Freedom

There are good exit navigation throughout the application and ample edit and undo features which are very accessible.

Consistency

The application offers users one function, and the language used is particularly direct and consistent.

Error Prevention

The user flow has the potential to create errors unbeknown to a new user. There are no information/educational prompt against fields.

Recognition

The left hand menu allows for good recognition and is easily retrievable. However, there are no information videos for user who may use the system once a month.

Flexibility

Users have good access to quickly edit monthly direct debit amounts. There is no grouping for users to select a pre-defined group of customers, which would make the system more efficient.

Minimalism

There are fields which are not required in order to generate the file for example a Postal Address. There are too many decorative fields which are not required.

Error Recovery

Xml files are generated with no amounts, which should trigger an error message, IBAN numbers have a predefined length, but a failsafe is not within the application.

Help

There are no help videos or users manuals within the system.

User Flow Diagram for SEPA XML GENERATOR

MAJOR PAIN POINT

The image shows a screenshot of a web application interface for 'SEPA XML GENERATOR'. The main content area is titled 'Add Customer' and contains a form with several input fields. The form is partially obscured by a large, semi-transparent grey rectangular box, which is the 'major pain point' mentioned in the title. The form fields include:

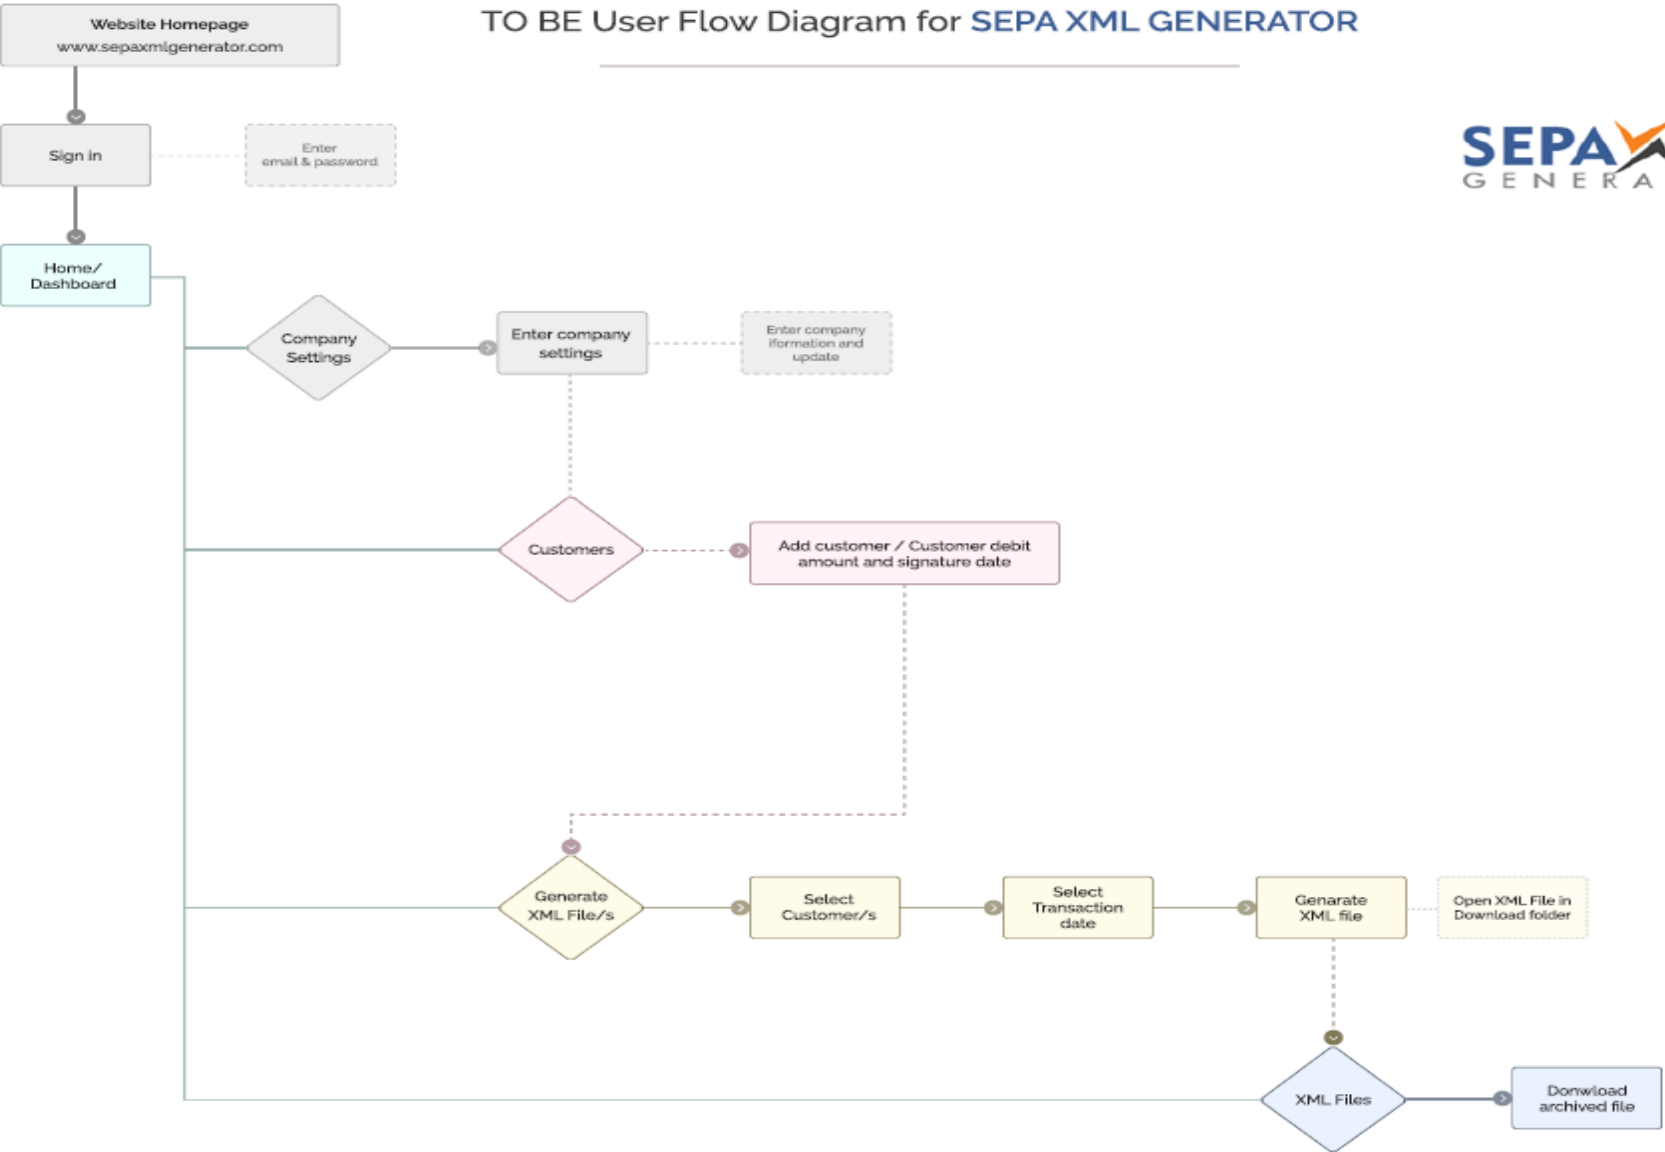

- IMMEDIATE DEBITING REFERENCE (MANDATE NUMBER)**: A text input field.
- AV CARD**: A text input field.
- IBAN**: A text input field.
- Name***: A text input field.
- Address**: A text input field.
- Phone No.**: A text input field.
- Mobile Number***: A text input field.
- Email Address***: A text input field.
- ZIP**: A text input field.

The left sidebar contains a navigation menu with the following items:

- Dashboard
- Customers
- Customer Account
- Company Settings
- Reports
- Help

The SEPA XML GENERATOR logo is visible in the bottom left corner of the sidebar.

A Successful File Completion – First User Trial Result

CONCLUSIONS

CONCLUSIONS

It is difficult to find relevant users within the B2B Space

Competitor Analyses is almost impossible due to getting access to protected software

B2B Users appear more concerned about results and getting the job done

Potential Test Candidates have issues undertaking research concerning security

The UX is geared towards one type of user, at one stage in the Customer Journey

Prospects who are using competitor products will need alternative functionality, for example, they will need to upload their current customers

From a Reflective perspective – the process forced me to step back from my prefixed assumptions
